Corgi Class Chair

The Corgi Class Chair provides support for children with mild postural instability, whilst maintaining the appropriate appearance for the classroom setting. The adjustments are simple:

- Seat Depth Adjustment
- Hip Guide Adjustment
- Seat Height Adjustment
- Lateral Support Adjustment
- Footplate Height Adjustment

From
£438.50

The Corgi Class Hi-Sitter shares all of the features of the Corgi Class Chair. The main difference is the higher working height to enable children to access areas of the curriculum such as Science and Technology.

Corgi Hi-Lo

This new version of the Corgi line-up allows the user to power up to the correct height to work. This helps children operate more independently and avoids the need for height adjustable tables. The actuator lifts the seat position 300mm (12 inches) from a start position of 420mm (16.5 inches).

From
£799.00

Want to try one?

We loan out these chairs for a trial which enables you to assess their suitability for children you work with. This also helps us to keep the costs down. The system is so easy to use, and you have a guide book to refer to - you will find it very easy to adjust. This will also make sure that you are familiar with future adjustments that may be required when you purchase one of the Corgi range.

Technical Data	Size 0	size 1	Size 2	Size 3	Corgi Class Hi-Lo
